Vision

Q₁

A concise, forward-looking declaration about the long-term goal of the company, department, or team.

What broad, societal impact does this project contribute to? What north star should this project look to in moments of uncertainty? What is the timescale of this vision (e.g., 6 months, 1 year, 5 years, indefinite)?

Partnership

Q₁

How this engagement builds trust, alignment, and opportunity for future collaboration.

What would make this collaboration exceptionally successful? How might the collaborator benefit from this project?

Impact

Q₁

The operational, strategic, economic, or knowledge-driven outcome of this collaboration.

How will this project impact primary stakeholders, the decisions they need to make, or the actions they need to take?

Analysis Pathway

Q₂

How the analytical approach enables the intended impact.

Does the intended impact lend itself more to prediction or inference? What kind of models or visualizations enable the intended impact?

Narrative

Q₃

How findings translate to an immediate or future impact on stakeholders, the decisions they need to make, or the actions they need to take.

To what extent was the intended impact realized? How can findings be explained in terms of the target outcome? In what ways did this project contribute to the broader vision or partnership?
